

WINTERWORK — DESIGN + UX MASTER BRIEF

A product-level redesign specification for Claude Design. UX first, then design system, then visual execution.

1. Product goal

Transform Winterwork into a premium personal operating system for disciplined progress. Preserve existing functionality while radically improving information hierarchy, interaction clarity, visual quality and responsive behavior.

2. Source hierarchy

Existing Winterwork code is the functionality source of truth. The UX contract and design system in this pack are the redesign authority. Existing references define atmosphere. Untitled UI and shadcn are component references, not the brand identity.

3. Core loop

ARC → TODAY → ACTION → COMPLETION → FEEDBACK → PROGRESS → NEXT ACTION. Supporting systems: Habits, Quit, Mood, Focus, Training, Nutrition, Journal, Profile, Settings.

4. Highest-risk flows

Active workout set logging, habit completion/undo, focus timer, quit recovery, onboarding navigation, paywall transitions, responsive navigation, offline/error recovery.

5. Visual direction

Dark-first graphite surfaces, icy blue/cyan accent, restrained translucency, controlled ambient light, precise typography, quiet cinematic depth. Avoid generic SaaS, neon HUDs, purple AI gradients and excessive glass.

6. UX standard

Every screen must make orientation, purpose, priority, next action, feedback and recovery clear. High-frequency actions should be one or two interactions where reasonable.

7. Deliverable

A coherent redesign of all known product areas, including desktop/mobile shells and all relevant empty/loading/error/offline/success/locked states. The output should feel launch-ready, not like a moodboard.

Core screens

Area	Primary job	Density
Today	Decide what to do now	Medium
Arc	Understand 90-day journey	Low–medium
Habits	Complete/manage habits	Medium
Focus	Run focused session	Low
Training	Choose/execute training	Medium–high
Active workout	Log current set	Low–medium
Progress	Understand improvement	High
Nutrition	Manage daily target	Medium
Settings	Configure product	Medium
